UNIFORM CRIME REPORTS

Volume 2

August, 1931

Number 8

Contents of the August Bulletin.

The bulletin for August contains a table showing the number of offenses known to the police for that month as submitted to the Bureau of Investigation by police officials cooperating in the project of compiling national crime statistics. The figures are grouped into two tables, namely, Table I, which contains the figures for urban police departments, and Table I-A, which contains those furnished by counties, the possessions, and others. In addition thereto reports for months previous to August, received since the July issue of the bulletin, will be found in Tables II and II-A. Revised returns, which are those published previously but in which some adjustment has been made, are shown in Table II-B.

The term "offenses known to the police" is designed to include those crimes designated as Part I classes of the Uniform Classification occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported to the police: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of \$50 and over and (b) thefts of under \$50; and auto theft. The figures contained herein include also the number of attempted crimes of the designated classes. Attempted murders, however, are reported as aggravated assaults. In other words, an attempted burglary or robbery, for example, is reported in the monthly bulletin in the same manner as if the crime had been completed.

"Offenses known to the police" include, therefore, all of the above offenses, including attempts, which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Tables are published in the bulletin showing the extent of the population area and the number of current and supplementary returns received for 1931. Tables indicating the average daily number of offenses and the per cent of each offense class to the whole number reported are also shown.

In publishing the reports sent in by chiefs of police in different cities, the Department of Justice does not vouch for their accuracy. They are given out as current information which possibly may throw some light on problems of crime and criminal law enforcement.

Population Table.

The number of cities which at any time during the current year have contributed returns of offenses known to the police to the Bureau of Investigation reached 1,386 during August. The population represented by those cities is 49,634,671. The population represented by returns received from county and other jurisdictions is not included in the above figures. In the following table are shown the number and per cent of the cities and the number and per cent of the population of those cities of more than 10,000 inhabitants from which returns have been received for any one month of 1931. The figures are based on the 1930 census. In addition to those listed in the table there are 644 cities of an aggregate population of 3,590,543 which also contributed returns at some time during the current year. The data in the following table are based upon the number of cities from which returns have been received, exclusive of county and other reports.

Population groups	Total number of cities or towns	Cities filing returns		Total population	Population represented in returns	
		Number	Per cent		Number	Per cent
Total.....	962	742	75	55,340,077	46,044,126	79

E. Cities 10,000 to 25,000.....	606	413	68	6,007,200	6,363,292	79

The above table does not include 644 cities of a population less than 10,000, aggregating a total of 3,590,543, from which returns were received for 1931.

1,229 Cities Contributed Returns for August.

Returns for the month of August were received by the Bureau of Investigation from police departments of 1,229 cities, including 28 cities which had not previously furnished the reports. In the table which follows are shown the number of returns by States received and published currently during 1931.

Total Number of Published Returns.

Police departments which have failed to furnish reports for each month of the current year are requested to do so in order that figures will be available for 1931 from the entire reporting area.

In the following table are shown the total number of returns, including supplementaries, which have been received and published for the year 1931. Supplementary returns, as distinguished from current, are those which have been received for earlier months since the previous issue of the bulletin.

Percentage Table of Part I Offenses.

The per cent of each offense class to the whole for 1931 is shown by months in the following table. These figures, however, are not intended to indicate crime trends for the particular period but merely reflect the per cent of each class of the designated crimes to the whole group for the various months. The figures are based on the total number of offenses reported by all contributing cities, exclusive of obviously defective and incomplete returns.

Larceny—Theft.

It will be observed from the monthly Return A form that offenses of Larceny—theft are divided into two classes, namely, thefts involving property valued at \$50 or more and thefts involving property valued at less than \$50. Care should be exercised by officials submitting returns to avoid reporting under the first-named classification offenses of grand larceny and under the second classification offenses of petty larceny, in States where the amount of \$50 is not the sum differentiating between those two offenses. For example, in some States grand larceny is the felonious taking and carrying away anything amounting to \$35 or over in value. Accordingly, if a larceny of \$45 be reported to police departments in such States it should be recorded on the monthly return under the classification Larceny—theft (b) under \$50 in value, notwithstanding the fact that the offense may be termed

grand larceny in the particular jurisdiction. The determining factor in ascertaining in which group an offense of larceny should be recorded is the value of the property or the amount involved. It should also be remembered that attempts to commit larceny should be reported under the classification (b) under \$50 in value.
